

## 2008 Rule Book Changes

### Page 9:

**QUALIFYING CLASSES:** Will be required to qualify in race dress. Ie; all belts, parts, fluids, etc in place. Officials may invoke privilege and impound all vehicles between qualifying and the next upcoming race event. Only tire pressures and suspension adjustments will be allowed in impound. No parts or fluids may be added or removed during impound.

### Modifieds Page 49:

D: Must run stock type belt driven mechanical water pump mounted in stock location.

E: Only one single uninterrupted ignition power feed wire may run between the battery source and the distributor with the exception of one single ignition disconnect switch. No accessory ports, terminals, or other devices allowed.

F: MSD Pro Billet Distributer PN 8365 and MSD Module PN 8364 are allowed.

### Super Stocks Page 31:

B: Must run stock type belt driven mechanical water pump mounted in stock location.

C: Only one single uninterrupted ignition power feed wire may run between the battery source and the distributor with the exception of one single ignition disconnect switch. No accessory ports, terminals, or devices allowed.
